Running Time: 1 Hour, 25 Minutes

Written by: [Michael Gunton](#) [3],

[Martha Holmes](#) [12]

Over the course of five billion years, life on Earth has evolved into the incredible richness and variety we see today. One Life is a celebration of the most brilliant and imaginative stories of survival from the natural world. Cutting-edge cinematic techniques capture unprecedented and astonishingly beautiful chronicles of animal ingenuity. One Life takes us from birth through to the creation of the next generation - then takes us one step further - revealing that, whether we have wings or flippers, eight legs or two, the triumph of life connects us all.
